STAVELEY SERVICES CANADA NAMED AS INDEPENDENT CANADIAN CALIBRATION SERVICES PARTNER FOR NATIONAL INSTRUMENTS PRODUCTS of AUSTIN TEXAS.

Staveley Services Canada is pleased to announce they can offer basic and full calibration for a wide range of National Instrument or NI products. Staveley can provide additional calibration services such as express calibration, on-site calibration and calibration services for ensemble instrumentation products that are not from NI.

Staveley can provide two levels of calibration certification:

- ✓ ISO/IEC 17025 non-accredited and basic calibration service without measurement results: stating that the product meets or exceeds specification and is traceable to National Standards.

If your quality requirements state that you need more than a basic calibration certification:

- ✓ ISO/IEC 17025 Accredited calibration, with before and after measurement results: stating that the product meets or exceeds specification, traceable to National Standards, before and after measurement results and ISO/IEC 17025 Conformance Mark.
